

Pașca Alexandru Ștefan

Cluj-Napoca, Romania

Personal projects:

- F1 game (C# game, using Windows Forms in Visual Studio) – a simple racing game where you need to overtake all the cars in your way, without crashing into them
- Minesweeper (C# game, using Console Application in Visual Studio) – a classic game where you need to click all the empty spaces and avoid the bombs
- Blackjack (C# game, using Windows Forms in Visual Studio) – a casino game where the goal is to have a count of 21 or as close as possible, but not get past that limit
- Portfolio Site (HTML, CSS, Bootstrap in Visual Studio Code) – a website developed by me from the scratch, in order to present myself and my projects

Debugging and testing was entirely made by myself and a simple method that I used was writing down everything that needed to happen and all the exceptions that needed to be handled. After the code was written, I did as many tests as possible to make sure everything was right. I used GitHub for all of my projects, in order to have a backup and work from everywhere.

Education and diplomas:

- Student at Babes-Bolyai University, Cluj-Napoca, Faculty of Mathematics and Computer Science, Department of Computer Science – 2022 – 2025
- Udemy Front-End Web Development course (<https://www.udemy.com/course/front-end-web-development/>) – August 2022
